Summary

CSE graduate from KUET with a strong foundation in Data Structures, Algorithms, Design Principles and Full-Stack Development with a competitive programming background. Passionate about building production-ready software systems and AI-integrated products.

Education

Khulna University of Engineering & Technology

BSc in Computer Science & Engineering

Khulna, Bangladesh

March 2022 – July 2026

Projects

Learn — Context-Aware Roadmap & Learning Recommendation System | [GitHub](#)

(Tech Stack: Next.js, React Flow, MongoDB, Cohere, Pinecone, NextAuth.js, Cloudinary, Groq SDK)

- Built an AI-powered learning platform using **Next.js** and **MongoDB** with interactive roadmap generation using **React Flow**.
- Implemented **semantic search** using **Pinecone vector DB** improving query relevance and retrieval efficiency.
- Designed an asynchronous embedding pipeline for efficient vector search.

DocQ — Anonymous Patient-Doctor Consultation App | [GitHub](#)

(Tech Stack: Swift, UIKit, Firebase Auth, Firebase Realtime Database, JSON)

- Engineered a privacy-first iOS platform where patients anonymously post health queries and doctors respond in real time.
- Implemented a role-based system (Patient/Doctor) with **Firebase Authentication** and live data sync via **Firebase Realtime Database**.
- Designed and parsed a structured JSON doctor registry, enabling dynamic profile discovery within the app.

Virtual Campus — Peer-to-Peer Academic Resource Sharing App | [GitHub](#)

(Tech Stack: Java, Android Studio, Firebase Authentication, Firebase Storage)

- Built an Android platform where students upload and discover academic notes via topic-based search, enabling peer-driven knowledge sharing.
- Integrated **Firebase Authentication** for secure login/signup and **Firebase Storage** for scalable note file management.

Achievements

Problem Solving

- **Codeforces (NOTsoGENIUS) — Max Rating: 1317 | Rank: Pupil | 644+** problems solved across Data Structures, Algorithms, Graph Theory, and Dynamic Programming.

Hackathons & Contests

- Reached the **Final Round** of BUET CSE Fest 2026 Hackathon (Team Yip Yip Gattis)
- Participated in KUET BITFEST IUPC 2025 (Team KUET_Wrong_Answers)
- Participated in PSTU IT Carnival Programming Contest 2024 (Solo)

Skills

Languages: C++, python, swift, Typescript, Java

Frameworks: ExpressJS, React, NextJS

Database & ORM: MySQL, MongoDB, Firebase

Tools & DevOps: Git

Core CS: Data Structures & Algorithms, OOP, OS, Computer Networks, DBMS

Extra-Curricular & Leadership

Vice President

SGIPC KUET

August 2025 – July 2026

- Organizing contests, training sessions, and representing the club in inter-university programming events.

Junior Executive, LFR Competition

KUET CSE BITFEST 2025

January 2025

- Managed participant registration and on-ground execution.
